Alexandria Stone Ware Manufactory

The subscriber takes this method of informing his customers, that he continues to carry on the above business as usual, and hopes to be always able to supply any orders they may favor him with. But as he is confident he sells his Stone Ware lower than any other made in this country, and as his business will not admit of the employment of many hands, and consequently having to do the greater part of the work himself, and small accounts being troublesome to collect, he is therefore under the necessity of informing them that in future all sums of 20 dollars and under, must be cash, and above that sum a credit of 60 days. His friends from the country will be always supplied on the shortest notice, and all favors thankfully received by

Public Sale.

THE subscriber wishes to sell a Farm in the county of Prince William, adjoining the lands of Mr. Edmund Brooke, and Mr. R. B. Alexander, containing by a late survey two hundred and forty eight acres, which will be sold at Public Auction, to the highest bidder, on Monday the 31 day of February, on the following terms, viz. One fourth in hand, and the balance at equal instalments of one and two years without interest, if punctuality is observed in the payment, otherwise interest will be required from the date of the purchase, and a deed of trust on the land to secure the payment which may be made in paper of any of the chartered banks of Virginia, or the District of Columbia.

On this land are many desirable improvements, such as a comfortable dwelling house and other Buildings, an orchard of well selectek apples and, never failing springs of excellent water. No land can be better situated than this tract for the successful operations of agriculture; nor any more susceptible of speedy renovation by clover and plaster, the effects of which are satisfactorily exemplified on the adjoining land. One of the fields is laid down in wheat, which the purchaser will be expected to pay for at a reasonable price for the seed and cultivation. Any person desirous of purchasing will be shewn the land before the day of sale on application to Mr. Alexander.

At the same time will be sold on the premises,

All the stock of cattle, hogs and sheep of the subscriber, with many articles of household and kitchen furniture, on a credit of nine months for all sums over ten dollars; for which bond with approved security will be required, carrying interest from the date if not punctually paid.

Notice.

The public are hereby informed that a Company has been formed under the title of THE QUANTICO WAREHOUSE COMPANY, who have erected, one mile below the town of Dumfries, a large and convenient Warehouse on Quantico creek, for the storage of flour, grain, etc which warehouse will be ready for the reception of produce on Monday the third of Feb. next. The trustees of said Company have appointed Zebulon Kankey their Agent, to attend the said Warehouse, to receive produce on storage and grant receipts for the same. And for the prompt delivery of all articles received in the said warehouse by their agent, (fire alone excepted) the Company hold themselves bound. All persons depositing flour, grain, etc must pay, before taken away, the following storage, viz. For each barrel of flour 6 cents; if it remains in said warehouse one month 6 cents; and in the same proportion for the time it may remain. For each bushel of wheat or other grain two cents; if it remains over one month three cents; and in the same proportion for the time it may remain. And for all articles of merchandise a reasonable storage only will be demanded. Persons storing flour may have it inspected, or not, at their option. If not inspected, the agent's receipt will specify the brand and the state of the barrels. The weight of one bushel wheat, running measure of each load or parcel of wheat. All articles stored, the same to be returned to the owner when called for, be it flour, wheat, other grain, etc. Customary allowances for wastage, etc. excepted.

Quantico Warehouse is situated on Quantico Creek only two miles from its junction with the Potomac river, at all times navigable for lighters. There are belonging to this creek a sufficient number of lighters to ensure a brisk transportation down the creek of all articles stored. Vessels may be got to take produce to the district of Columbia, Baltimore, Norfolk, or elsewhere. The present freights are—To the district twelve and half cents per barrel of flour, and to Baltimore and Norfolk 25 cents from the mouth of Quantico. The proximity of this warehouse to a large extent of country, added to the goodness of the roads leading to it from the westward, being little inferior to paved ones. It being found by actual survey little more than 25 miles from Hay Market to Dumfries, will, it is confidently believed by the trustees, by this route greatly lessen the expense of transportation of produce even to the district of Columbia, and they pledge themselves to the public to use every means within their power to give satisfaction.

EXCHANGE

On Boston at three days sight for six thousand dollars and on Philadelphia at thirty days sight for fifteen hundred dollars, for sale by

J. G. LAIDLEY & Co
Jan 20

From the Federal Republican.

CHEAP WHOLSOME BREAD.

MESSRS. EDITORS,

Conceiving it to be the design of the great author of our existence, in endowing us with various gifts and faculties, that we might be mutually advantageous to each other—I am therefore of opinion, that it is a duty incumbent on all who may be so fortunate as to make any useful discovery either in the healing art, or in domestic economy, to make it known, so that the whole human family may partake of its benefits. For which purpose I solicit the aid of your very useful and wide circulating paper, to make the world acquainted with one which I have lately made in domestic economy; which, when put generally into practice, will, I am convinced, prove as beneficial to the human race as any discovery which has been made within the last century. Dr. Jenner's not excepted.

The sun having had, as some of our philosophers suppose, a severe conflict with some planet or comet, in which unfortunately he came off with two black eyes, the earth was deprived the whole of last summer of those benign rays which beamed from him formerly, so necessary to ripen into perfection the grain in the fields. In consequence of which there is a great out cry in the land for bread.—To remedy this distressing calamity, I employed all the energies of my mind, and after six days experiment, without the aid of any book, ancient or modern, except my small change pocket book, made the discovery above alluded to, which is of no less importance than the way to convert rank poison into cheap, wholesome bread, or simply making a proper use of the two elements, pure water and air. Thus we see verified what the philosophical poet, Shakespear, said of adversity, comparing it to a toad which, although it appeared ugly and venemous, often bore a precious jewel in its crown, for had no adversity produced Necessity, the mothe of Invention, it is probable this inestimable discovery never would have been made. To explain the process by which this miracle is wrought, I think I cannot do better than to give a copy from my change pocket book, of my six days experiment, which runs thus:

Monday morning—Gave Mrs. to buy bread for the day, eight in family	37 1-2
Called in at the tavern on the way to business, and drank a gill* of gin	6 1-4
Got at the same time 3 segars	6 1 4

Thursday morning examined the account of the three preceding days, and found during that time, my family had ate nine 12 1 2 cent loaves of bread, and that I had drank and smoked precisely as many. Alarmed at this statement by which I found that what I thought before was trifling sipping and smoking amounted to a sum sufficient to furnish bread for my family.

I determined to set about correcting the procedure, gave Mrs. the usual bread money, and proceeded on my way to business; came to be tavern, tried to pass but could not succeed, went in and drank a glass of pure water and came out without segars, the landlord appeared much surprised 37 1 2

Friday—Gave Mrs. the bread money, proceeded to business, and after several trials succeeded. ed in passing the tavern door 37 1 2

Saturday—Gave Mrs. the bread money, proceeded to business and passed the tavern door without the least difficulty 37 1.2

On examining the statement of the account for those three last days, I found I had made for my family, nine 12 1 2 cent loaves of bread, by simply drinking pure water, unadulterated by the poison of ardent spirits, and by breathing pure air, unadulterated by the foul intoxicating fumes of the Indian weed.

Having, as I hope, delineated the process of making this bread clearly understood—I shall next proceed to point out the wholesome qualities of it, when so made; it sweetens the breath, cures the head ache, clears the eyes from fiery humors, cures bloated & carbuncle faces, prevents the gout, and so renovates the nervous system as to render it out of danger of those dreadful diseases, the virtago, appoplexy, palsy, and quiets the conscience, and in short, transforms a man, reduced to a situation little better than a brute, into a rational human being.

To conclude, would it not be strange after being made acquainted with this easy method of obtaining bread, if we should hear a man after seeing him take down at one breath, the price of a 12 1-2 cent loaf, in poisoned water—Exclaim "Lord, have mercy on us! what will become of us," we shall starve, flour is $16 per barrel, when by drinking pure water without poison, he could reduce the price to one half that amount. ST. EVERMOND.

The character of St. Evermond delineated by his own hand.

I am a philosopher, as far removed from superstition as from impiety; a voluptuary, who has not less abhorence for debauchery, than inclination for pleasure; a man, who has never known want nor abundance. I occupy that station of life which is despised by those who possess every thing envied by those who have nothing, & only relished by those who make their felicity to consist in the exercise of their reason. Young, I hated dissipation; convinced that a man must possess wealth to provide for the comforts of a long life; old, I disliked economy; as I believe that we need not greatly dread want, when we have but a short time to be miserable. I am satisfied with what nature has done for me; nor do I require a fortune. I do not seek in men what they have of evil, that I may censure; I only find out what they have ridiculous that I may be amused. I feel a pleasure in detecting their follies. I should feel a greater, in communicating my discoveries, did not my prudence restrain me: life is too short, according to my ideas, to read all kinds of books and to load our memory with an infinite number of things at the cost of our judgment. I do not attach myself to the sentiments of scientific men to acquire science; but to the most rational, that I may strengthen my reason.—Sometimes I seek for the more delicate minds, that my taste may imbibe their delicacy; sometimes for the gayer, that I may enrich my genius with their gaity; and although I constantly read, I make it less my occupation than my pleasure. In religion and in friendship, I have only to paint myself such as I am: in friendship more tender than a philosopher; and in religion, as constant and as sincere as a youth who has more simplicity than experience. My piety is composed more of justice and charity, than of penitence. I rest my confidence on God, and hope every thing from his benevolence. In the bosom of Providence, I find my repose and my felicity.

ALEXANDRIA.

THURSDAY, JANUARY 30.

FROM OUR CORRESPONDENT AT WASHINGTON.

Jan. 29.

The bill forbidding the arming, fitting out, or the selling of vessels of war, or in better words, the bill for preventing piracy, was again, for the whole of yesterday under the consideration of the house of Representatives. The opponents of the measure left no means untried to cripple its operation or postpone its completion. Amendment after amendment was proposed without the desired effect, till at length the house seemed to grow weary of, and disgusted with the propositions. Much nonsense was breath'd about the unfortunate South Americans, as if their independence was to be won or lost upon the floor of congress; and those who wished to flourish and cut a figure in the eyes of their constituents, by a lavish display of gratuitos zeal in the cause of the patriots, had a full swing of opportunities to grtify themselves, and to do them justice, made no sparing use of it. While that part of the house, however, were thus earnestly employed in thinking and haranguing about the patriots of the Spanish provinces, the other part could not be diverted from fixing their eyes upon the U. S. alone, for whose interest they deemed it expedient to carry the proposed measure through the house, fighting its way manfully through all the hostile amendments. At length after a most wearisome day, the question was put by the speaker whether the bill should be engrossed for a third reading, and because it might not be amiss to let all whom it might concern know who voted for the the good cause, and was not wise for any man to light his candle and put it under a bushell, it was proposed and granted to take the votes by yeas and nays—The question therefore was so put, when after all there were 94 ayes to 60 noes; so that the bill will be read a third time this day. After which another opportunity on the question of passing the bill, will be afforded to the orators of holding forth again, and enabling the house to get rid in a pleasant way of one day more of the time that seems to lie heavy on hands; there being now actually 28 days of the session remaining for the house to dispose of.

A correspondent on reading this gazette of yesterday morning, in which was contained a concise view of the law now before congress, for interdicting commercial intercourse with foreign ports, where our vessels are not admitted, has suggested the following queries:

Cannot the law be evaded by entering at Bermuda from the West-Indies—and clearing out from thence and then coming to the United States?

Could not the same vessel clear out from the U. S. for Bermuda, & then sail from Bermuda to any port in the W. Indies?—Especially if the vessel belonged to Bermuda. A vessel belonging to Nova-Scotia, might take in a cargo at the W. Indies, proceed to, and enter at, and clear out from Bermuda, for the United States, where she would be permitted to enter. She might again load and clear out for Bermuda, and there enter, and clear for any prohibited ports.

AMERICAN MANUFACTURES.

The legislature of New York have before it, propositions to request its senators and representatives in congress to obtain efficient protection for our infant manufactures, especially cotton and woolen; recommending public men to wear clothes of domestic fabrication; & exempting, by law, the buildings and machinery used in those manufactories from any taxation and the persons engaged in them from militia duty, working on roads or serving as jurors.

Historical Extract.—"From the year 1528 to 1538, perpetual summer prevailed in France: during four years, not two days frost were experienced. Nature, exhausted by a continued heat, incessantly produced blossoms, but had not strength to bring the fruit to maturity; a scarcity of provisions was the consequence of this phenomenon; the harvest was scarcely sufficient to supply seed for the following year. Worms and insects of every kind, multiplied ad infinitum, and destroyed the little fruit which the earth yielded. A most dreadful famine prevailed, and the consumption of unwholsome food gave rise to a disorder which carried off one fourth of the inhabitants of France."

ELASTICITY OF GENIUS.

An elegant writer declares, that there is a secret, but never failing resource, an inexhaustible elasticity in genius and virtue, that render them all sufficient to themselves. They may be degraded, but they can never be broken, they may be trampled upon, but never dishonored. It is the contention between the sun and the cloud.

NEW YORK, Jan. 27.

Latest from France.—The editors of the New York Gazette have received, per the Minerva, French papers and letters to the 30th of November. As to political news there is none. The commercial changes are fully detailed in the subsequent letters.

The following extracts of letters from Bordeaux, dated the 29th November contain correct and interesting information to the merchants of the United States. The editors received them from respectable houses in this city:

"During the passed and present month there has been but little doing in American produce in this market. Sales of cotton are now completely at a stand and such as have been forced have not exceed ed 330f. for Sea Islands 230f for Louisianas, and 215f. for Uplands, duty paid: and indeed some of the latter of inferior quality has been sold as low as 205f. The last advices from the United States, which announce that the crops will be less abundant and that the prices there are much higher than had been expected have as yet produced no disposition on the part of the purchasers to come into the market: but the holders in general are less inclined to make great sacrifices of their old stocks, which are far from being heavy. It is to be expected that the manufacturers will soon be compelled to come forward for supplies and that our prices will in consequence be susceptible of amelioration.

"Of tobacco we have a sufficient stock for the wants of the Regie for some time to come. That administration being already tolerably well supplied manifests no desire to increase its stock of leaf at present; but with a little patience on the part of the holders, good prices may be obtained for the quantity at market: but it would not be advisable to increase it by fresh importations. The last sale consisted of a cargo of superior Richmond, at 135f and some parcels of inferior Virginias at 100 to 85f.

"The apprehensions of an approaching scarcity of breadstuffs, continue to prevail, and have occasioned a considerable rise in the price of grain and flour. With a view as much to quiet the public uneasiness, as to encourage importations of those necessary articles, the government has granted premiums thereon, to continue until the 1st of septembe next, which allow a bounty of 5f per 100 kilogrames, or about 200 lbs on foreign wheat and flour: but I doubt whether this will be found a sufficient inducement to ship from the U States. American flour would bring at per sent 62f per barrel, which even with the premium, is far from being an encouragement to ship at the prices last quoted in America, and it is presumable that the opening of the British ports will tend to enhance them. I continue to believe that no real scarcity will be found to exist, but nevertheless the spirit speculation may keep up, and produce a further augmentation in our prices. Rice, of course will be influenced by the state of the demand for other grain: there is none at present here in first hands. The last sales were in small quantities, as high as 50 to 55f.

Pot ashes are held at 62 to 68f. and although the stock is small the demand is but limited. Havana sugars are steady at 75 to 95f for whites, and 55 to 70f for browns; muscovado 50 to 70f; foreign coffee 80 to 95c; pepper 85 to 92 1 2c: pimento 75 to 80c.—all in entrepot. Indigo & dye woods are extremely abundant, and almost unsaleable.

"In consequence of the entire failure of the vintage added to the fear that our wines and brandy will not be adequate to the consumption of Europe, those articles have progressively risen to unprecedented prices. The quality denominated cargo wines, but too inferior this year for exportation, meets with purchasers for home consumption at the high rate of from 500 to 300f per ton on the lies, and brandy now costs on board upwards of 810 for American 4th proof.—Of course you can import neither, & your price of both articles must necessarily advance. Raw silk continues very high, but silk goods are proportionably cheaper than that material. Exchange on London 25; 25 at 90 days."

Extract from another letter.

"Bordeaux, 26th November.—By a late decision of the director General of customs, foreign vessels that are expedited from parts of France to the island of St Domingo, under an authorization from the Minister of Marine, with a cargo of articles the produce or manufacture of this country, are subjected only to the port charges laid on national vessels, and their return cargoes from that Island are admitted as if imported in French Bottoms, viz. muscovado sugars, coffee, cotton, lignumvitae, die woods, mahogany, and other woods used for furniture will pay only the duties established on goods of French colonies, as specified in my price current—and clayed sugars, cocoa, hides, and indigo, will pay the duty of foreign produce in French vessels which is still a difference of 5f per ql on the three former articles and twenty five centimes per lb, on the latter, this concession is intended to favour the intercourse with that Island, and is an advantage, I beg leave to recommend to your attention.

Nov 28.—A Royal ordinance is just promulgated, granting from the 15th Dec to the 1st Sept ensuing a premium for the importation of grain as follows—

2 . 50c	per ql, or 50 kilog. of	wheat or flour
1 75	do	of rye or rye flour.
1 25	do	of barley or its flour.

Newburyport, Jan. 21

From Martinique.—We have been favored, by the politeness of a friend, with the perusal of a letter from Trinity, Martinique, dated Dec. 20, 1816, from which we make the following Extracts:

"Fish is worth 5 dolls; No. 1. Beef 16, No. 2, 12 50; Staves 25; Lumber 25, payable in Molasses at 40 cents, which is scarce. Coffee is 6 doll's; brown Sugar 9 to 10; Rice 10 dolls; Flour 16; Corn 2 dolls. per bushel."

"I am sorry to inform you that much fault is found with the Newbury Beef; the bbls. are too large for the quantity—it is not packed close enough."

"I am informed that a number of vessels are lying at St. Pierres who cannot purchase Molasses even with cash."

From the Boston Daily Advertiser.

There seem to be many indications of a revival of letters in Greece. There is a learned Greek from the Island of Chios now persuing his studies in the literature of his ancestors as well as of the present day at the university of Gottingen. There has recently been established in Munich, in Germany by professor Thiersch, an athenaeum for the education of Young Greeks, which is said to be in successful operation. There are now young men at this school from Greece proper, the Islands, Asia, Moldavia, and Wallachia; among whom are sons of the first families, including a grand-son of the late Prince of Moldavia, a nephew of the Archbishop Ignatio; and three brothers of the Archipelago of the name of Commeri.

The new empress of Austria Princess of Bavaria has been called the divorced wife of the Prince of Wirtemberch. She was married without her consent to the then Prince Royal of Wirtemburgh who was since become a king, by the Death of his father on the same day that she became an Empress by her marriage to the Emperor Francis, but this marriage was never followed by cohabitation, and it was afterwards annulled and the prince married to another person. A German paper says "The young Princess of Bavaria is not a divorced wife, but a virgin restored to liberty: she may therefore accept the hand of the sovereign who offers it her as the most worthy of her heart.

Princeton, Jan. 24.

A paragraph having appeared in one of the public papers, giving an exagerated representation of the disorders which have recently taken place in the college here, it is proper to state, that tho' the riot was violent, no personal injury whatever was sustained by any individual; that the orders of college were suspended for about six and thirty hours and have ever since been proceeding peaceably in their usual course. And that notwithstanding the inflexible determination of the authority of the college to enforce its laws; the probability is, that eventually not more than a fourth part of the students will be found to have had such a concern in the late unhappy and riotous proceedings, as to require their permanent exclusion from the institution.

The printers of newspapers in the state of New Jersey, and in the cities of New York and Philadelphia, are respectfully requested to publish this statement with a view to correct or prevent erroneous representations.

SAVANNAH, January 20.

Arrived, brig Supply, Kingston, St. Vincents, 15 days—sugar, molasses and wine; there were but few vessels in the port of St Vincent's; left at Bermuda brig Harmony, Nichols, just arrived from Bristol, Rhode Island, and was up for sale. Schooner Olive from New-York bound to St. Domingo, put into Bermuda on the 28th ultimo, with the loss of both masts, and considerable other injury. On 7th ultimo, on the passage from St. Vincents to Bermuda, in lat. 19, 41, lon. 64, Captain Kingston was boarded by a large privateer schooner mounting 16 or 18 guns, and manned with about 70 men; Captain K received the greatest politeness from them; her boarding officer was dressed in an English naval uniform, and the crew, generally, spoke the English tongue; when boarded by the above vessel, she had American colors flying—they informed Capt. K that they were from Buenos Ayres, bound on a cruise, and that they had captured several vessels, manned and sent them to Carthagena: a few hours after leaving the Supply, the above schooner boarded 4 or 5 vessels, but Captain K did not ascertain who they were.

Land for Sale

A tract or parcel of Land, containing between two and three hundred acres, on the north side of Occoquan, in Fairfax county, about 5 miles west of Occoquan mills. It is well watered with never failing springs, it is also well timbered, and the great quantity of fine timber on it renders it the more valuable to any person in the coopering line. This land is of the middle soil, and produces corn, wheat or any other grain tolerable well—there is about 100 acres cleared and under good fence. The improvements are a log dwelling house & other out houses, and a good apple orchard of about sixty trees.

ALSO,

One other tract in the same county, within three miles of Occoquan, lying on Sandy Run, containing 47 acres—one half in cultivation and under good fence, the remainder heavily timbered. There are on the premises an old framed dwelling house and out houses and an apple orchard of eighty bearing trees.

Any person inclining to purchase can view the premises and know the terms by applying to the subscriber who lives near them.

Thomas Gossom.

NOTICE.

The subscriber intending to remove from this place in a short time, requests all those indebted to him by bond, note or open account, to come forward & settle them up to first of January 1817.

He will dispose of the Houses & Lots he now occupies, and possession given the 15th October next. The dwelling house is calculated for the accomodation of a family, with all the necessary out houses, and a very productive garden, subject to a small ground rent—the stand for retailing goods, or purchase of produce, is inferior to none in town.

It is deemed unnecessary to give a more minute description, as it is presumed those wishing to purchase will view the premises.

He will also sell a quarter acre Lot and Dwelling House thereon, near the court house.

The above property will be disposed of on accommodating terms to those wishing to purchase.

JAMES KENNEDY & SON,

BOOKSELLERS, KING STREET,

Have just received from LEE'S PATENT MEDICINE Store, No. 46 Maiden Lane, N. York.

A FRESH SUPPLY

Of the following genuine Medicines.

For the prevention and cure of Bilious and Malignant Fevers, is recommended

Hahn's Anti-Bilious Pills

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings, in several parts of the West Indies, and the Southern & Middle States, particularly in N. York Philadelphia, Baltimore, Petersburg, Richmond, Norfolk, Edenton, Wilmington, Charleston, and Savannah. The testimony of a number of persons at each of the above places can be adduced, who have reason to believe, that a timely use of this salutary remedy has, under Providence, preserved their lives, when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy, founded on mere assertion.

It is not, indeed, presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience, for believing that a dose of these Pills, taken once in every two weeks, during the prevalence of our bilious fevers, will prove an infallible preventative: and further, that in the earlier stages of those diseases, their use will very generally succeed in restoring health, and frequently in cases esteemed desparate, and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation, and of every age.

They are excellently adapted to carry off superfluous bile & prevent its morbid secretions—to restore & amend the appetite—to produce a free perspiration and thereby prevent colds which is so often of fatal consequences. A dose never fails to remove a cold it taken on its first appearance—they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on change of climate.

They have been found remarkably efficacious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

HAMILTON'S WORM DESTROYING LOZENGES.

Which have cured an immense number of persons of both sexes, of every age, and in every situation, of various dangerous complaints arising from worms, and from obstructions or foulness in their stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of, as operating with violence; on the contrary, a particular excellence of this remedy is its being suited to every age and perfectly in it contains nothing but what is constitution. nocent, and is also mild in its operation, cannot injure the most delicate pregnant lady or the tenderest infant of a week old, could no worms exist in the body; but will, without pain or griping, cleanse the stomach and bowels, of whatever is foul or offensive, and thereby prevent the production of worms, and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occasion.

DESCRIPTION OF WORMS.

And the symptoms by which they are known:

Worms which infest the human body, are chiefly of four kinds, viz.—The Teres, or large round worm; the Ascarides, or small maw-worm; the Cucurbitina, or short, flat, white worm; and lastly, the Tænia, or tape-worm, so called from its resemblance to tape. This is often many yards long, and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food, and sometimes voracious; purging, with slimy & fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; slow fever, with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face heated and flushed.

Persons afflicted with any of the above symptoms, should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success, in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm season, will effectually prevent "the vomiting and purging of chint"—a dreadful disease, which annually destroys the hand some infan part of our citizens it likewise th mildest and m ser tain remedy known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

TO PARENTS AND GUARDIANS.

Extract from the Militia Law of the District of Columbia.

Sec. 28. And be it further enacted, that the respective courts of enquiry shall have power to cause to be bound for a term of years to the several commandants of companies, battalions, and legions and their successors in office, as the case may require, such number of boys and young men, with the consent of their parent, or other person authorised, as they in their discretion may think proper, for the purpose of being instructed in the different branches of military music and of serving as musicians when they may be competent thereto to the several companies, battalions and legions; and the father of any youth who may be so bound, otherwise subject to be enrolled, shall be exempt from all duty in the militia so long as his son so bound may continue to serve in the corps to which he would otherwise belong, as well during his apprenticeship as thereafter: and the several legionary courts of enquiry shall make provision from time to time for the cloathing, maintenance, and the properly instructing all such youths, to be paid from the fund arising from the fines imposed by this act; and the commanding officers of legions, shall cause the drummers and fifers and other musicians of their respective legions, to meet at the same times and places that commissioned officers are required to meet, for the purpose of being trained by the brigade inspector, or other officer, there to be instructed in their respective branches of music for which purpose the commanding officer of the legion may employ such person or persons as he may think proper and capable to instruct such drummers and fifers, and other musicians.

Applications, agreeably to the above section, to be made to
